Programs To Look Forward To

Home Planetarium a "Window on the Heavens" from any place on Earth you can time travel 10,000 years—both into the past and future.

Imagine™ provides children the opportunity to have fun creating their own stories and watching them come to life. It features multiple background screens and numerous static and animated objects to build into a film like sequence. Typing the story enables the child to gain familiarity with the computer keyboard, while learning and receiving a positive attitude toward writing.

Speed Read uses well tested techniques that will increase the user's reading speed.

MECC (Minnesota Educational Computing Consortium) A Series of 20 products for both home and school.

EduKat Tutorial "Scratch Pad"—Great for learning all the primary Math functions.

A Bee C's—the first in a series of educational speaking programs for children ages 3 to 6. The **A Bee C's** features the Commodore Bee who guides children in learning the alphabet and in playing games that reinforce skills learned.
